Summary

Full Stack Developer with over 2 years of experience in building scalable web applications using **React**, **TypeScript**, **Node.js**, **PostgreSQL**, and **AWS**. Current interests include **Next.js** and **Python**. Proficient in agile development practices and committed to secure software development. Currently enhancing backend development skills through service-based architectures and complex database management.

Projects

Let's Parlay ([Code](#) | [View Site](#))

February 2024 - Present

A Full Stack web application built with **React**, **TypeScript**, **Tailwind CSS** and **Vite** on the front-end; **Node.js**, **Express.js**, and **PostgreSQL** on the back-end, while utilizing the flexibility & reliability of **AWS EC2** for deployment

- Utilized **React Router** and **Context API** for streamlined navigation of live sports betting odds using **Odds-API**
- Built the back-end with **Node.js** and **Express**, interfacing with **PostgreSQL** via the **pg** library
- Secured authentication using **JSON Web Tokens** and **Argon2** password hashing for enhanced security
- Leveraged **Vite** and **TypeScript** for a performant, type-safe front-end development experience
- Used **Python**, **BeautifulSoup**, and **Requests** to scrape and process **UFC event results** and **fighter rankings**, with automated scheduling for continuous data updates

Defi-City ([Code](#) | [View Site](#))

November 2023 - January 2024

A **React**, **TypeScript**, **Tailwind CSS** web application, using **Vercel** for front-end deployment and hosting

- Created a **React/TypeScript** application presenting real-time cryptocurrency data via the **CoinGecko API**
- Enabled watchlist creation and management using **React hooks**
- Visualized cryptocurrency trends over a 7-day period using the **Victory** charting library

Experience

Nemonx - Full Stack Developer (React, TypeScript, NestJS, Prisma)

February 2025 - May 2025

- Developed secure education verification interfaces using **React, TypeScript and Tailwind CSS**, enabling institutions to request and verify student transcripts with proper authorization protocols
- Implemented **RESTful API** endpoints with **NestJS** for credential verification workflows, reducing manual processing time by 20% while maintaining FERPA compliance
- Engineered data models and relationships in **Prisma** for storing sensitive educational credentials, ensuring data integrity across **blockchain** and traditional database systems
- Created role-based **authentication** system that differentiated between students, employers, and institutional users, enabling appropriate access controls for confidential academic records

Amazon - Process Guide

September 2019 - October 2023

- Guided 60+ associates as inbound stow Process Guide to meet and surpass department goals
- Designed improvements in RSR department to effectively lead our team to rank #1 building in the region for over a year

UPS - Revenue Recovery Supervisor

November 2017 - July 2018

- Led a team of 15 associates in the Revenue Recovery department within the Richmond Distribution Center
- Managed all aspects of operations, including payroll, training, staffing, and goal achievement in fast-paced environment

Education

Full-Stack Software Engineering Bootcamp | LearningFuze | Irvine, CA

October 2023 - February 2024

- Completed 800+ hours of immersive training in **React, TypeScript, Node.js, and PostgreSQL**
- Developed web applications using modern frameworks while applying **mobile-first design** principles
- Implemented **Git** version control, **RESTful APIs**, and **asynchronous programming** in collaborative projects
- Applied **data structures, algorithms**, and **Test-Driven Development (TDD)** for robust application development
- Built full-stack projects with **AWS** deployment, **server management**, and **database integration**
- Gained experience with **Agile methodologies**, **UI/UX design with Figma**, and **career readiness training**

BS. Business Administration | University of California, Riverside | Riverside, CA

September 2007 - June 2011

- Developed strong analytical and problem-solving skills through coursework and collaborative group projects
- Concentration was in key business concepts such as financial economics and management
